20630 Mufford Crescent, Unit #309
Langley, British Columbia V2Y 2V9

www.CTSTURBO.com

WHAT IS INCLUDED

- 1x Air Filter
- 1x CTS heat shield
- 2x Weather strip
- 2x Zip ties
- 1x SAI filter
- 3x Rubber mounts

NOTES

Vehicle used in this guide is a 2019 MK7 Jetta 1.4T.

Always make sure the car is safe to work on. Do not work on a hot motor.

STEP 1

Remove the breather hose from the stock air box

STEP 2

Disconnect the inlet pipe from the turbocharger

STEP 3

Carefully lift up the air box and disconnect the secondary air hose.

Remove the air box

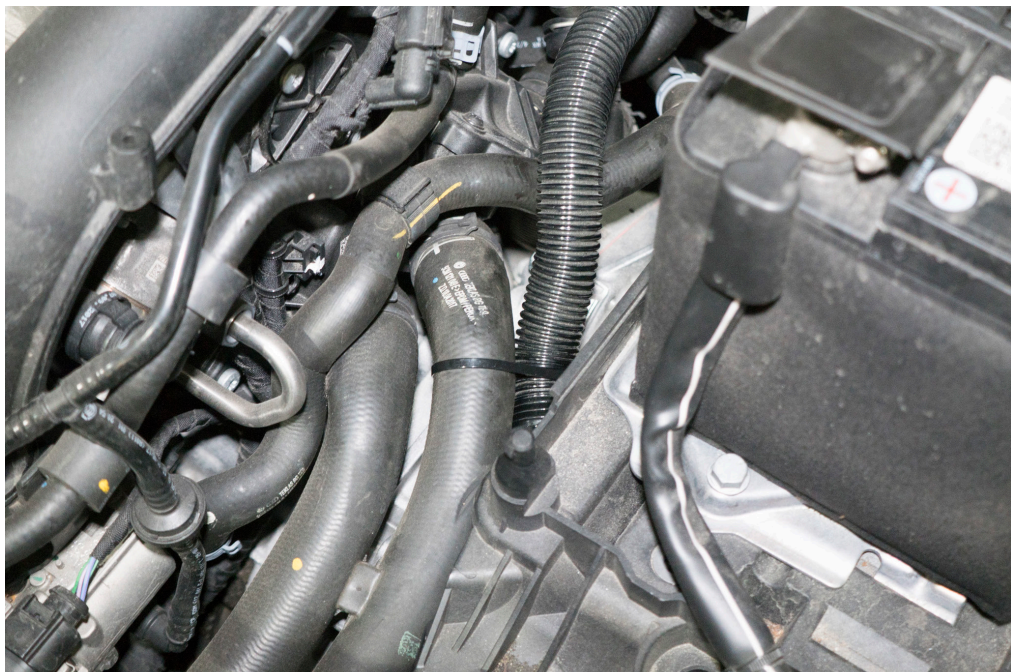

STEP 4

Install the provided SAI filter to the hose

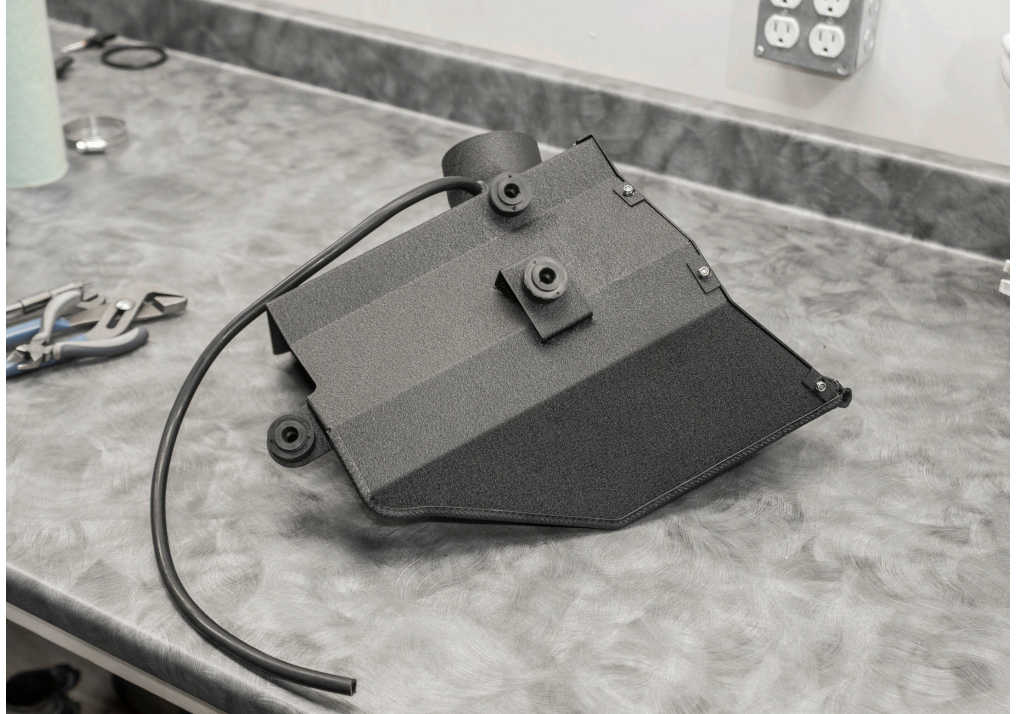

STEP 5

Using one of the zip ties place the SAI filter and hose just under one of the mounting points for the air box and secure it

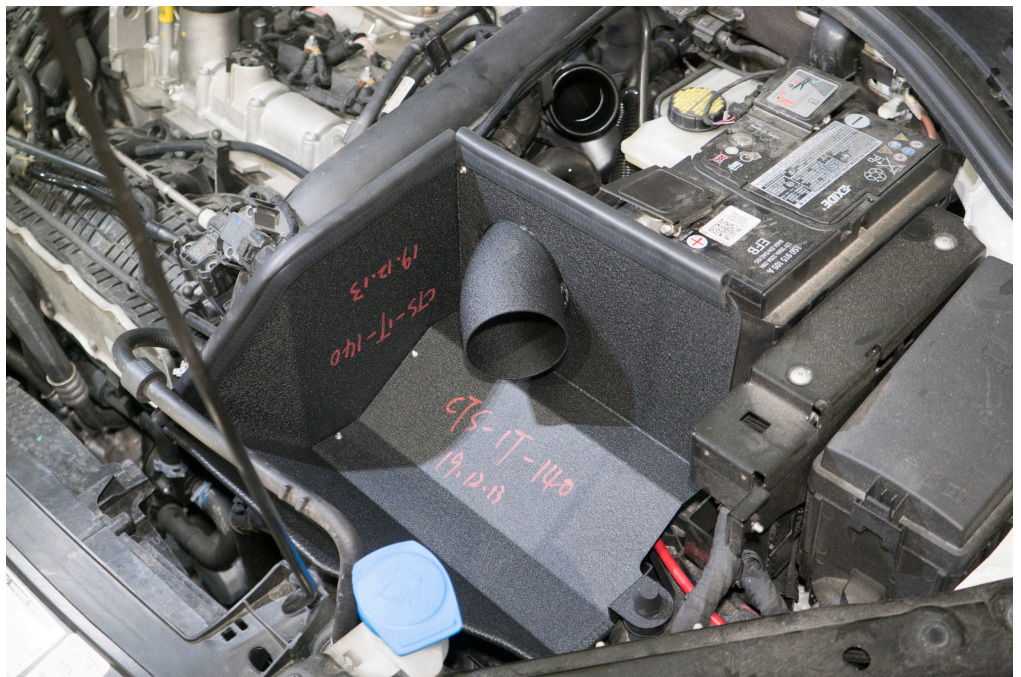

STEP 6

Install the breather hose and rubber mounts to the CTS heat shield

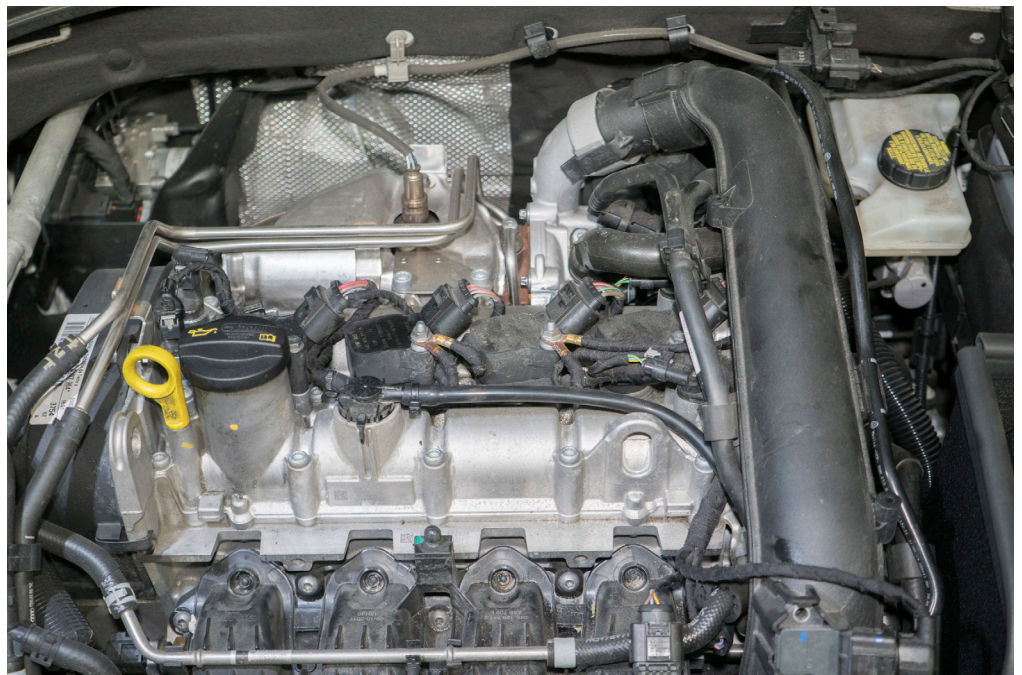

STEP 7

Install the heat shield and press down to ensure the rubber mounts are secure to the mounting points

STEP 8

Run the breather line under the outlet pipe and connect.
Use a zip tie to secure

STEP 9

Connect the CTS heat shield and turbocharger with the stock inlet pipe

STEP 10

Install the air filter

You are done!
